

Math with Henry — Website: Open Items

What's still needed from you to get the site ready to launch | August 14, 2026

The website is mostly built. Below are the four things left that need to come from you — two are quick content questions, and two are accounts/purchases with step-by-step instructions included so you can do them yourself, or hand this page to whoever's helping you set them up.

1. Real Testimonials

The site currently shows sample/placeholder quotes. Please send 2–3 real quotes from parents or students — a sentence or two each is plenty.

- Who it's from (first name is fine, or “Anonymous”)
- What subject/course it relates to (e.g. Algebra 2, Calculus AB)
- The quote itself — in their own words is best

2. Bible Verses (or Sayings)

The site now shows a “Verse of the Day” banner at the top of the page, rotating daily through a starter list of 30 well-known verses (King James Version). Before this goes live, let us know:

- Are you happy with a general starter list, or would you rather send your own list of verses (or sayings) to use instead?
- If you have your own list: which translation do you prefer (KJV, NIV, ESV, etc.)? Note that some translations are copyrighted, which may limit how they can be used on the site — KJV is public domain and always safe to use.
- Any verses you specifically want included, or want left out?

3. Register the Domain & Set Up Your Email (one checkout, all through Porkbun)

This needs to be done under your name/payment method, since you'll own the domain. Porkbun's email hosting is tied to a domain you register with them, so the domain and your `henry@mathwithhenry.com` inbox are set up together in a single checkout — not two separate steps.

Part A — Register the domain and add email hosting (about 10 minutes)

- 1 Go to **porkbun.com**.
- 2 Search for **mathwithhenry.com** in the search bar and add it to your cart.
- 3 Add **Porkbun Email Hosting** for that same domain to the cart as well — this is what lets you create the `henry@mathwithhenry.com` inbox. New domains get a 15-day free trial of email hosting; after that it's \$36/year for one inbox (10 GB storage, plus 20 free forwarding addresses included).

- 4 Make sure “WHOIS Privacy” is included (it's usually free and automatic) — this keeps your personal address off public records.
- 5 Create a Porkbun account and complete checkout. Domain cost is typically \$10–15 for the first year, on top of the email hosting above.
- 6 Once checkout is done, create the inbox **henry@mathwithhenry.com** and set a password — no separate DNS setup needed, since the domain and email are already connected under one account.
- 7 Save the login (email + password) and share it with Jason — it's needed to point the domain at the website once it's ready.
- 8 Log in at Porkbun's webmail (or set it up in the Mail app on your phone/computer using IMAP) and send yourself a test email to confirm it works.

Part B — Optional: add a second domain

- 1 While you're already checking out, consider also searching for and adding **mathwithhenry.study** to the same cart — registering it alongside mathwithhenry.com takes one extra click.
- 2 This is optional and just reserves the name; check with Jason before deciding what (if anything) to do with it, so it gets set up correctly.

4. Create Your Cal.com Account (for booking sessions)

This replaces the placeholder “Book on Cal.com” button on the site. Cal.com is free and lets parents/students pick an open time slot directly — about 15 minutes to set up.

- 1 Go to **cal.com** and click “Sign up” — the free plan is all you need.
- 2 Verify your email and log in.
- 3 Go to **Event Types** and create four events to match what's on the website:
 - 4 • **10-Minute Intro Call** — free, 10 minutes
 - 5 • **1-Hour Tutoring Session** — \$50, 60 minutes
 - 6 • **2-Hour Tutoring Session** — 120 minutes, no breaks
 - 7 • **Group Session** — up to 4 students, \$40/student/hour
- 8 Under **Availability**, enter your current hours: Tue–Thu 4–8 PM, Wed 3:30–5:30 PM, Fri 6–9 PM, Sat 1–9 PM, Sun 7–9 PM.
- 9 Copy your public booking link (it will look like **cal.com/your-username**) and send it to Jason to add to the site.

Note: Cal.com payment collection (“Cal Pay”) is a separate, optional decision — for now the site collects payment directly via Zelle and PayPal, so this isn't required to finish setup.
